

## Trim Water Pressure Relief Valves (Adjustable)

An adjustable set pressure trim water pressure relief valve is a small valve designed to relieve pressure build-up in a sprinkler system or in valve trim. It is open to a drain line. Unless otherwise specified, rated working pressure is 175 psi (1205 kPa). The range of pressure setting is shown below.

### Model 55L-60

#### Product Specification

Model No	Valve Size		Rated Working Pressure		Remarks
	in	(mm)	psi	(kPa)	
Model 55L-60	1/2, 3/4	(15, 20)	300	(2065)	a, b, c, d

**Remarks:**

- a. Valve supplied with Female NPT inlet and outlet connection.
- b. Adjustable relief pressure settings from 0 to 75, 20 to 200, 100 to 300 and 20 to 300 psi (0 to 515, 140 to 1380, 690 to 2070 and 140 to 2070 kPa).
- c. Approved when supplied with a stainless steel, bronze or brass valve body.
- d. Not suitable for discharging the full rated pump capacity.
